NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1 - Business Organization, Nature of Operations and Basis of Presentation

Organization and Operations

Cell Source, Inc. ("Cell Source", "CSI" or the "Company") is a Nevada corporation formed in 2012 and is the parent company of Cell Source Limited ("CSL"), a 100% owned subsidiary which was founded in Israel in 2011 to commercialize a suite of inventions relating to certain cancer treatments. The Company is a biotechnology company focused on developing cell therapy treatments based on the management of immune tolerance. The Company's lead prospective product is its patented Veto Cell immune system management technology, which is an immune tolerance biotechnology that enables the selective blocking of immune responses. CSL's Veto Cell immune system management technology is based on technologies patented, owned, and licensed to Cell Source Limited by Yeda Research and Development Company Limited, an Israeli corporation ("Yeda"). The Company's target indications include: lymphoma, leukemia and multiple myeloma through the facilitation of safer and more accessible stem cell (e.g. bone marrow) transplantation acceptance, treatment of end stage kidney disease and other non-malignant organ diseases through improved organ transplantation (broadened donor pool, reduced dependence on post-transplant anti-rejection therapy), and ultimately treating a variety of cancers and non-malignant diseases.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP") for interim financial information and with the instructions to Form 10-Q and Article 8 of Regulation S-X. Accordingly, they do not include all of the information and disclosures required by U.S. GAAP for complete financial statements. In the opinion of management, such statements include all adjustments (consisting only of normal recurring items) which are considered necessary for a fair presentation of the condensed consolidated financial statements of the Company as of June 30, 2017 and for the three and six months ended June 30, 2017 and 2016. The results of operations for the three and six months ended June 30, 2017 are not necessarily indicative of the operating results for the full year ending December 31, 2017 or any other period. These unaudited condensed consolidated financial statements should be read in conjunction with the Company's audited financial statements and related disclosures as of December 31, 2017 and 2016 and for the years then ended included in our Annual Report on Form 10-K for those years as filed with the Securities and Exchange Commission ("SEC") concurrently with this filing.

Note 2 - Going Concern and Management Plans

During the six months ended June 30, 2017, the Company had not generated any revenues, had a net loss of approximately \$1,965,000, and used cash in operations of approximately \$1,147,000. As of June 30, 2017, the Company had a working capital deficiency of approximately \$5,255,000 and an accumulated deficit of approximately \$13,435,000. These conditions raise substantial doubt about the Company's ability to continue as a going concern within twelve months from the date these financial statements are issued.

The Company's primary source of operating funds since inception has been equity and debt financings. Subsequent to June 30, 2017 and as more fully described in Note 8, *Subsequent Events*, the Company received an aggregate of approximately \$2,050,000 through the issuance of short term notes payable and the issuance of Series A Convertible Preferred Stock. Management's plans include continued efforts to raise additional capital through debt and equity financings. There is no assurance that these funds will be sufficient to enable the Company to fully complete its development activities or attain profitable operations. If the Company is unable to obtain such additional financing on a timely basis or, notwithstanding any request the Company may make, if the Company's debt holders do not agree to convert their notes into equity or extend the maturity dates of their notes, the Company may have to curtail its development, marketing and promotional activities, which would have a material adverse effect on the Company's business, financial condition and results of operations, and ultimately the Company could be forced to discontinue its operations and liquidate.

The accompanying condensed consolidated financial statements have been prepared in conformity with U.S. GAAP which contemplate continuation of the Company as a going concern and the realization of assets and satisfaction of liabilities in the normal course of business. The carrying amounts of assets and liabilities presented in the financial statements do not necessarily purport to represent realizable or settlement values. The condensed consolidated financial statements do not include any adjustment that might result from the outcome of this uncertainty.

Note 3 - Summary of Significant Accounting Policies

The Company's significant accounting policies and applicable recently released accounting standards are disclosed in Note 3, *Summary of Significant Accounting Policies*, in the Company's Annual Report on Form 10-K for the years ended December 31, 2017 and 2016. Since December 31, 2016, there have been no material changes to the Company's significant accounting policies, except as noted below.

Loss Per Share

The Company computes basic net loss per share by dividing net loss by the weighted average number of common shares outstanding for the period and excludes the effects of any potentially dilutive securities. Diluted earnings per share includes the dilution that would occur upon the exercise or conversion of all dilutive securities into common stock using the "treasury stock" and/or "if converted" methods, as applicable. Weighted average shares outstanding for the three and six months ended June 30, 2017 and 2016 includes the weighted average impact of warrants to purchase an aggregate of 2,043,835 shares of common stock because their exercise price was determined to be nominal.

The following securities are excluded from the calculation of weighted average dilutive common shares because their inclusion would have been anti-dilutive:

	June	30,
	2017	2016
Warrants	11,615,481	11,374,324
Convertible notes	1,651,804	3,203,450
	13,267,285	14,577,774

Convertible notes are assumed to be converted at the rate of \$0.75 per common share, which is the conversion price as of June 30, 2017. However, such conversion rates are subject to adjustment under certain circumstances, which may result in the issuance of common shares greater than the amount indicated.

Note 4 - Fair Value

The Company determines the estimated fair value of amounts presented in these condensed consolidated financial statements using available market information and appropriate methodologies. However, considerable judgment is required in interpreting market data to develop the estimates of fair value. The estimates presented in the financial statements are not necessarily indicative of the amounts that could be realized in a current exchange between buyer and seller. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts. These fair value estimates were based upon pertinent information available as of June 30, 2017 and December 31, 2016, and, as of those dates, the carrying value of all amounts approximates fair value. The Company estimated the fair value of its restricted common stock during the three and six months ended June 30, 2017 based upon observations of the sales of Preferred Stock convertible into common stock as well as the thinly traded volume and closing prices of its common stock. The Company obtained a third-party valuation of its common stock, which was also considered in management's estimation of the fair value of its restricted common stock during the six monthes ended June 30, 2017.

The Company has categorized its assets and liabilities at fair value based upon the following fair value hierarchy:

- Level 1 Inputs use quoted prices in active markets for identical assets or liabilities that the Company has the ability to access.
- Level 2 Inputs use directly or indirectly observable inputs. These inputs include quoted prices for similar assets and liabilities in active markets as well as other inputs such as interest rates and yield curves that are observable at commonly quoted intervals.
- Level 3 Inputs are unobservable inputs, including inputs that are available in situations where there is little, if any, market activity for the related asset or liability.

In instances where inputs used to measure fair value fall into different levels in the above fair value hierarchy, fair value measurements in their entirety are categorized based on the lowest level input that is significant to the valuation. The Company's assessment of the significance of particular inputs to these fair measurements requires judgment and considers factors specific to each asset or liability.

Both observable and unobservable inputs may be used to determine the fair value of positions that are classified within the Level 3 category. As a result, the unrealized gains and losses for assets within the Level 3 category presented in the tables below may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in historical company data) inputs.

The following table summarizes the valuation of the Company's derivatives by the above fair value hierarchy levels as of June 30, 2017 and December 31, 2016 using quoted prices in active markets for identical assets (Level 1), significant other observable inputs (Level 2), and significant unobservable inputs (Level 3):

		Total	Quoted Prices In Active Markets for Identical Liabilities (Level 1)	Significant Other Observable Inputs (Level 2)	Ur	ignificant observable Inputs (Level 3)
Accrued compensation	\$	79,273	\$ -	\$ -	\$	79,273
Derivative liabilities	Ψ	893,600			Ψ	893,600
Balance - June 30, 2017	\$	972,873	\$ -	\$ -	\$	972,873
Accrued compensation	\$	79,178	\$ -	\$ -	\$	79,178
Derivative liabilities		1,175,400	<u> </u>		•	1,175,400
Balance - December 31, 2016	\$	1,254,578	\$ -	\$ -	\$	1,254,578

Financial assets are considered Level 3 when their fair values are determined using pricing models, discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable. The Company's Level 3 liabilities shown in the above table consist of warrants with "down-round protection" as the Company is unable to determine if it will have sufficient authorized common stock to settle such arrangements, warrants deemed to be derivative liabilities according to the Company's sequencing policy in accordance with ASC 815-40-35-12, the conversion option of convertible notes payable, and an accrued obligation to issue warrants to certain founders of Cell Source Limited, which such warrants were issued as of June 30, 2017.

Assumptions utilized in the valuation of Level 3 liabilities are described as follows:

	For the Three Mo June 3		For the Six Months Ended June 30,			
	2017	2016	2017	2016		
Risk-free interest rate	1.03% - 1.89%	0.26% - 0.86%	0.76% - 1.93%	0.21% - 1.04%		
Expected term (years)	0.25 - 4.51	0.04 - 4.19	0.25 - 4.76	0.04 - 5.00		
Expected volatility	110%	152%	110%	152% -159%		
Expected dividends	0.00%	0.00%	0.00%	0.00%		

The expected term used is the contractual life of the instrument being valued. Since the Company's stock has not been publicly traded for a sufficiently long period of time or with significant volume, the Company is utilizing an expected volatility based on a review of the historical volatilities, over a period of time, equivalent to the expected life of the instrument being valued, of similarly positioned public companies within its industry. The risk-free interest rate was determined from the implied yields from U.S. Treasury zero-coupon bonds with a remaining term consistent with the expected term of the instrument being valued.

The following table provides a summary of the changes in fair value, including net transfers in and/or out, of all Level 3 liabilities measured at fair value on a recurring basis using unobservable inputs during the six months ended June 30, 2017:

	 ccrued pensation	Derivative Liabilities	Total
Balance - December 31, 2016	\$ 79,178	\$ 1,175,400	\$ 1,254,578
Issuance of warrants and conversion options	-	21,880	21,880
Change in fair value Balance - June 30, 2017	\$ 95 79,273	\$ (303,680) 893,600	\$ (303,585) 972,873

The Company's significant financial instruments such as cash, accounts payable, accrued expenses and notes payable were deemed to approximate fair value due to their short-term nature.

In 2011, the Company entered into a Research and License Agreement (the "Agreement") with Yeda Research and Development Company Limited for Veto Cell technology. As Yeda is a founder and a significant shareholder of the Company, it is a related party.

In connection with the November 28, 2016 amendment to the Agreement, the Threshold amount was raised to \$10,000,000 (the "Revised Threshold") and, as a result, the \$200,000 liability to Yeda was eliminated as of December 31, 2016. As the Company had not yet achieved the Revised Threshold as of June 30, 2017, no liability was recorded as of that date. In connection with the March 30, 2018 amendment to the Agreement, the provision for the payment of \$200,000 was permanently eliminated and the annual research budget was reduced to \$500,000.

Liquidity and Going Concern

We measure our liquidity in a number of ways, including the following:

		June 30, 2017		ember 31, 2016
	(ur	audited)		
Cash	\$	17,561	\$	3,735
Working capital deficiency	\$	(5,255,350)	\$	(6,243,356)

During the six months ended June 30, 2017, the Company had not generated any revenues, had a net loss of approximately \$1,965,000 and used cash in operations of approximately \$1,147,000. As of June 30, 2017, the Company had a working capital deficiency of approximately \$5,255,000 and an accumulated deficit of approximately \$13,435,000. Subsequent to June 30, 2017, the Company received an aggregate of approximately \$2,050,000 through the issuance of short term notes payable and the issuance of Series A Convertible Preferred Stock. These conditions raise substantial doubt about the Company's ability to continue as a going concern within twelve months from the date these financial statements are issued.

Our ability to continue our operations is dependent on the execution of management's plans, which include the raising of capital through the debt and/or equity markets, until such time that funds provided by operations are sufficient to fund working capital requirements. We may need to incur additional liabilities with certain related parties to sustain our existence. If we were not to continue as a going concern, we would likely not be able to realize our assets at values comparable to the carrying value or the fair value estimates reflected in the balances set out in the preparation of our financial statements.

There can be no assurances that we will be successful in generating additional cash from equity or debt financings or other sources to be used for operations. Should we not be successful in obtaining the necessary financing to fund our operations, we would need to curtail certain or all operational activities and/or contemplate the sale of our assets, if necessary.

During the six months ended June 30, 2017 and 2016, our sources and uses of cash were as follows:

Net Cash Used in Operating Activities

We experienced negative cash flows from operating activities for the six months ended June 30, 2017 and 2016 in the amounts of \$1,146,867 and \$951,633, respectively. The net cash used in operating activities for the six months ended June 30, 2017 was primarily due to cash used to fund a net loss of \$1,964,817, adjusted for net non-cash expenses in the aggregate amount of \$767,132, partially offset by \$50,818 of net cash provided due to changes in the levels of operating assets and liabilities. The net cash used in operating activities for the six months ended June 30, 2016 was primarily due to cash used to fund a net loss of \$1,521,228, adjusted for net non-cash expenses in the aggregate amount of \$320,218, partially offset by \$249,377 of net cash provided by changes in the levels of operating assets and liabilities.

Net Cash Provided by Financing Activities

Net cash provided by financing activities for the six months ended June 30, 2017 and 2016 was \$1,160,693 and \$948,425, respectively. The net cash provided by financing activities during the six months ended June 30, 2017 was attributable to \$135,000 of proceeds from the issuance of notes payable, \$225,000 of proceeds from the issuance of notes payable-related party and \$800,693 of proceeds received from the issuance of Series A preferred stock. The net cash provided by financing activities during the six months ended June 30, 2016 was attributable to \$1,043,000 of proceeds from the issuance of notes payable, partially offset by repayments of \$50,000 of related party notes payable and \$44,575 of debt issuance costs.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Recent Accounting Standards

For a description of our recently issued and adopted accounting pronouncements, see Note 3, *Summary of Significant Accounting Policies*, in Part 1, Item 1 of this Quarterly Report on Form 10-Q.

Item 3. Quantitative And Qualitative Disclosures About Market Risk.

Not applicable.

Item 4. Controls and Procedures.

Evaluation of Disclosure Controls and Procedures

Disclosure controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act, such as this Quarterly Report, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the Principal Executive and Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Internal controls are procedures which are designed with the objective of providing reasonable assurance that (1) our transactions are properly authorized, recorded and reported; and (2) our assets are safeguarded against unauthorized or improper use, to permit the preparation of our condensed consolidated financial statements in conformity with United States generally accepted accounting principles.

In connection with the preparation of this Quarterly Report, management, with the participation of our Principal Executive and Financial Officer, has evaluated the effectiveness of the design and operation of our disclosure controls and procedures and internal controls over financial reporting (as defined in Exchange Act Rule 13a-15(e) and 15d-15(e)). Based upon that evaluation, our Principal Executive and Financial Officer concluded that, as of June 30, 2017, our disclosure controls and procedures and internal controls over financial reporting were not effective due to the material weakness described herein.

A material weakness is a control deficiency (within the meaning of the Public Company Accounting Oversight Board (PCAOB) Auditing Standard No. 2) or combination of control deficiencies that result in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis. Management has identified the following material weakness:

Due to a lack of financial resources, we were unable to file our annual reports on Form 10-K for the years ended December 31, 2017 and December 31, 2016 and the quarterly reports on Form 10-Q for the periods ended March 31, 2017, June 30, 2017, September 30, 2017 and March 31, 2018 on a timely basis. Management evaluated the lack of financial resources on our assessment of our reporting controls and procedures and internal controls over financial reporting and has concluded that the control deficiency represented a material weakness.

Planned Remediation

Management's efforts to remediate the material weakness include raising funds and to seek new resources to alleviate this material weakness and to file all necessary regulatory reports on a timely basis. There can be no assurance that the necessary funds and resources will be obtained and the material weakness will be alleviated.

Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended June 30, 2017 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

There have been no material changes to the risk factors discussed in Item 1A. Risk Factors in our Annual Report on Form 10-K for the years ended December 31, 2017 and 2016 which was filed with the SEC concurrently with this filing.

Item 3. Defaults Upon Senior Securities.

The certificate of designation for the Series A Preferred Stock includes a provision that accrued dividends are to be paid each June 30th and December 30th.
